

Please dont make any changes to the cw requirement. Doing away with or making any changes to the code requirement will only turn our hf freq's into the next cb sewer pot. A lesson should be learned from the 11 meter example. If these types are turned loose on our hf freq's they will turn into the next cb freeband. 2 meters already has in some parts all you have to do is take a listen for yourselves . Please dont let our hf freq's turn into this. Dont do away with the cw requirement.

Thanks  
John WR8D
